Dedicated Android Developer with 5 years of experience, adept in bringing forth expertise in design, development, testing and maintenance of software systems. Proficient in Kotlin, Java, MVVM with Clean Architecture, CI/CD, REST APIs and latest jetpack libraries. Self management is a major part of my career as I have worked with both product and services based companies. I have great experience in collaborating with teams and also going on my own to deliver cutting edge mobile apps.

## WORK EXPERIENCE

### Senior Android Developer
Edkasa

*09/2020 - Present*                    *Lahore, Pakistan*

*Achievements/Tasks*

- Created and managed Android App from scratch as a solo developer now with a user base of 300K+ users and 25K+ DAU(Daily Active Users)
- Wrote Unit Tests and implemented Mobile DevOps for managing releases.
- Created AB Test plans and developed them to continuously improve UX and test new business models.
- Collaborated with the Design team to constantly fine-tune app experience.
- Maintained Google Play store release cycles for Alpha, Beta and Production channels.
- Implemented payment methods with Telenor Pay, EasyPaisa, SafePay and Google Billing Library for premium content.

*Contact : Samia Awan  - +92 336 5012761*
